HEALTH

Title: SUN PROTECTION & EDUCATION

Status: Current

Date of Origin: July 2012

Policy No: P 21

Last Reviewed: Nov 2019

POLICY STATEMENT

Brisbania Before & After School & Vacation Care Centre, aims to balance the risk of skin cancer from too much sun exposure with maintaining adequate vitamin D levels in our children. We aim to take a sensible approach to sun protection in our service that empowers children to take responsibility for their own health and wellbeing (*"My Time, Our Place" Outcome 3*)

The sun's ultraviolet (UV) radiation is both the major cause of skin cancer and the best source of vitamin D. We need vitamin D to maintain good health and to keep bones and muscles strong and healthy.

We aim to ensure that all children in attendance at the service when the UV forecast is 3 or above will be protected from harmful rays of the sun. All staff will model appropriate sun protection behaviour and enforce the sun protection policy.

Evidence suggests that childhood exposure to UV radiation contributes significantly to the development of skin cancer in later life. Ultraviolet (UV) radiation cannot be seen or felt and can be high even on cool and overcast days. This means our service educators will teach children not to rely on clear skies or high temperatures to determine the need for sun protection and provide them with exposure to resources and materials that will reinforce this message and assist children to understand the complexities of their environment (*"My Time, Our Place" Outcome 2*).

Strategies for teaching sun protection in the service will be based on children actively practicing and monitoring their own implementation of sun protection strategies as active learners (*"My Time Our Place" Outcome 4*). This will include children having opportunities to access UV alerts and monitoring the exposure to the sun of both themselves and their peers (*"My Time, Our Place" Outcome 5*). Our service believes that educating children about UV radiation will have a major impact on reducing their chance of developing skin cancer in later life.

CONSIDERATIONS.

National Quality Standard 2 Element 2.3.2 "Every reasonable precaution is taken to protect children from harm and any hazard likely to cause injury".

National Quality Standard 6 Element 6.3.2 "Continuity of learning and transitions for each child are supported by sharing relevant information and clarifying responsibilities"

National Regulation 114 "Outdoor space – shade"

National Regulation 100 "Risk assessment must be conducted"

WHS Act and Regulations 2012

PROCEDURE

Scheduling of Activities.

The following procedures will be implemented when scheduling activities when the UV Rating is 3 or above.

Outdoor activities will be scheduled where appropriate outside of peak UV times or planned for shaded areas and sun protection used for all children.

In non-daylight saving time (April-Sept) outdoor activities can take place at any time as long as sun protection (hats, clothing, sunscreen, shade) is used when the UV index is 3 or above.

Where the UV index for that day is not known, sun exposure will be minimised between the hours of 10am and 2pm (11am and 3pm during day light saving).

When planning excursions, sun protection will be included in the risk assessments for service participation.

All sun protection practices will be maintained while staff are escorting children to and from school and on any excursions.

Shade

Structured outdoor activities will be held in shaded areas whenever possible when the UV index is 3 or higher.

The service will identify shade options at various times of the day and the year within the outdoor space and promote these to the children. Educators will set up activities and play spaces to make best use of the shade.

Children will be encouraged to use available shade when playing outside during times when the UV index is high.

Clothing

Educators and children will wear protective clothing when outside during periods of time when the UV index is 3 or above.

When outdoors children will be encouraged to wear sun safe clothing with sleeves, collars or covered necklines.

Midriff, crop or singlet tops do not provide adequate protection and are not recommended. The Family Handbook will remind families and children of the appropriate clothing to wear to the service to meet the sun protection policy.

Children will be encouraged to wear sun safe hats that protect the face, neck and ears when outside. Recommended hats are bucket hats and broad brimmed hats. Baseball caps and visors are not recommended.

All educators will be required to wear tops with sleeves and collars or covered necklines and longer style skirts, shorts or trousers.

Children who do not have a hat must play in a sheltered area. Staff are to enforce the rule that where a child has not got a hat or is wearing clothing that is not recommended as appropriate they must access shaded areas in which to play

Sunscreen.

SPF 30+ Broad Spectrum water-resistant sunscreen will be available at the service for children and educators to use.

Educators will ensure there are regular reminders (minimum every 2 hours) to apply sunscreen prior to outdoor play during the months of October to March between 11am and 3pm or when the UV index 3 or above.

Permission to apply sunscreen will be included in the service enrolment form. Educators will respect the parents' right to refuse authorisation to apply sunscreen however will require children to wear appropriate clothing or play in the shade.

Role Modelling of Staff

Educators will wear protective clothing and practice a combination of sun protection strategies (sun-safe hats, clothing, sunglasses, SPF 30+ broad spectrum water resistant sunscreen) when in attendance at the service.

Wherever possible, staff will seek out shade when undertaking outdoor supervision in months where the UV alert is 3 or above.

Educators will use opportunities to discuss with children sun protection and demonstrate a positive and proactive approach to the management of sun protection in the service.

Collaboration with children.

Children will be provided with opportunities to take leadership roles in managing sun protection.

Children will be encouraged to access the internet/ newspaper to check the UV ratings for the day and advise educators of the times when the UV index will be 3 or above.

Opportunities for children to set alarms for when the UV index increases above or drops below 3 will be provided and children assigned duties regarding UV reminders, hats reminders and management of sunscreen.

Children will be reminded that they can remove their hats when the UV index falls below 3.

Education and Information

The sun protection policy will be available to all families using the service.

Parents will be informed of the sun protection policy including appropriate clothing requirements on enrolling their child in the centre through the Family Information Booklet.

Upon enrolment in the vacation care program, parents will be advised of suitable protective clothing and hats for children to wear at the service and encouraged to apply a sunscreen to their child prior to attending the service during the spring and summer vacation care periods.

Where children have allergies or sensitivity to the sunscreen, parents will be asked to provide an alternative sunscreen, or the child encouraged to play in the shade.

The centre will incorporate sun and skin protection awareness activities in the program and provide notices and posters about the topic from the Cancer Council NSW as appropriate .

Review.

This policy is adopted as standard for all OSHC services endorsed as Sun Smart by the Cancer Council NSW.

This Policy will not be changed unless advised by the Cancer Council NSW.
